AN INDEPENDENT STUDY OF SHAPE & COLOUR

FORM & FIELD

Ordinary forms. New perspectives.

VOL. 01

THE ART OF LOOKING CLOSER

01 / OBSERVATION

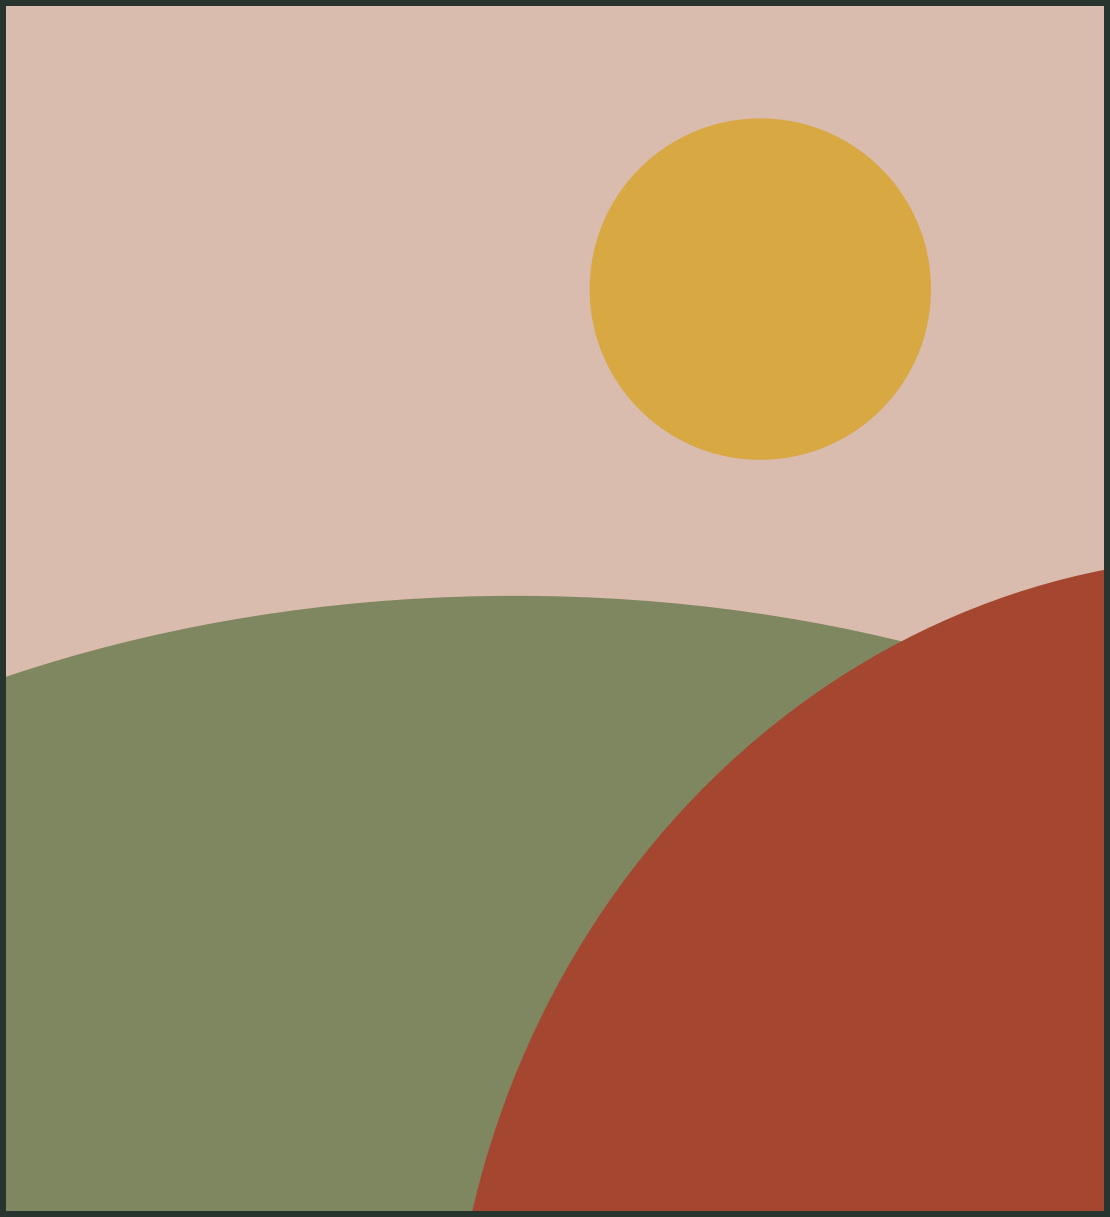
A slower way to see.

Look beyond the familiar.
A curve, a shadow, a quiet horizon:
small details change the whole picture.

This imaginary journal explores the rhythm of simple forms. Every illustration begins with a circle, a line or a shape found in everyday life.

Take your time. Turn a page. Look again.

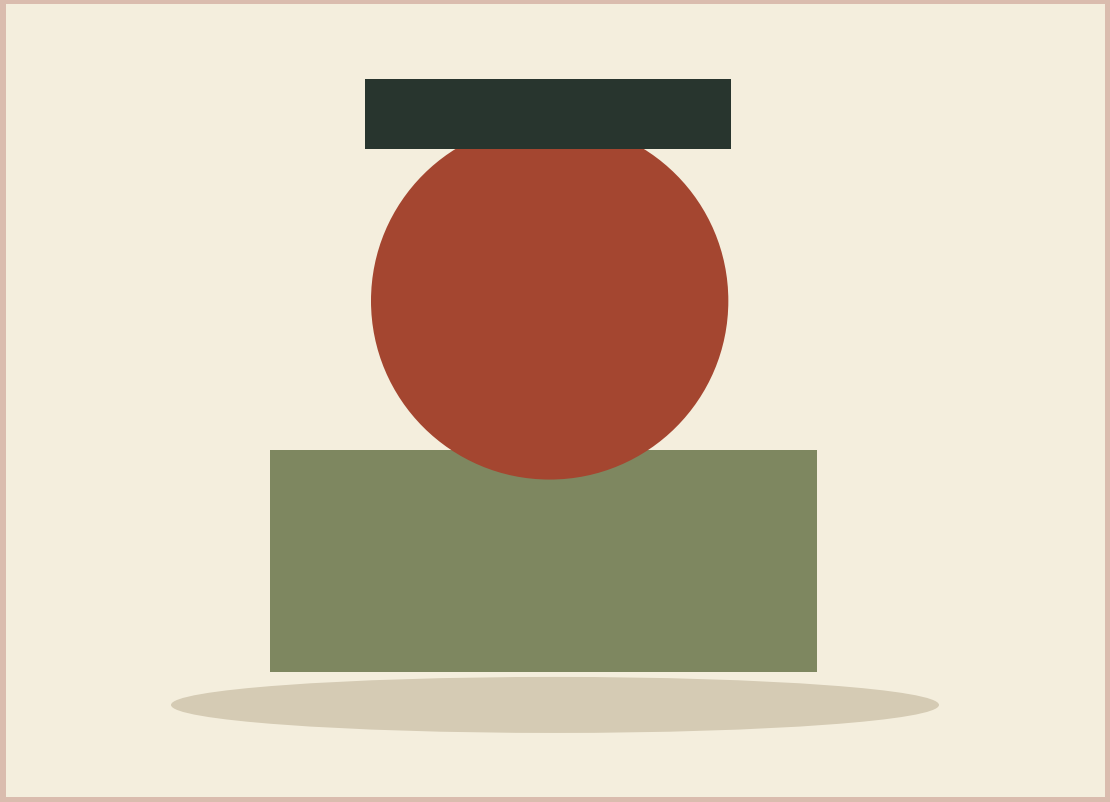
Original shapes. Imaginary places.



Where colour meets calm.

The shape of balance.

Less noise. More presence.



A study in weight, space and proportion.

COMPOSITION NOTES

Let space do the work.

An open margin gives a form room to breathe.
A small accent can bring a page into focus.
Balance comes from the space between.

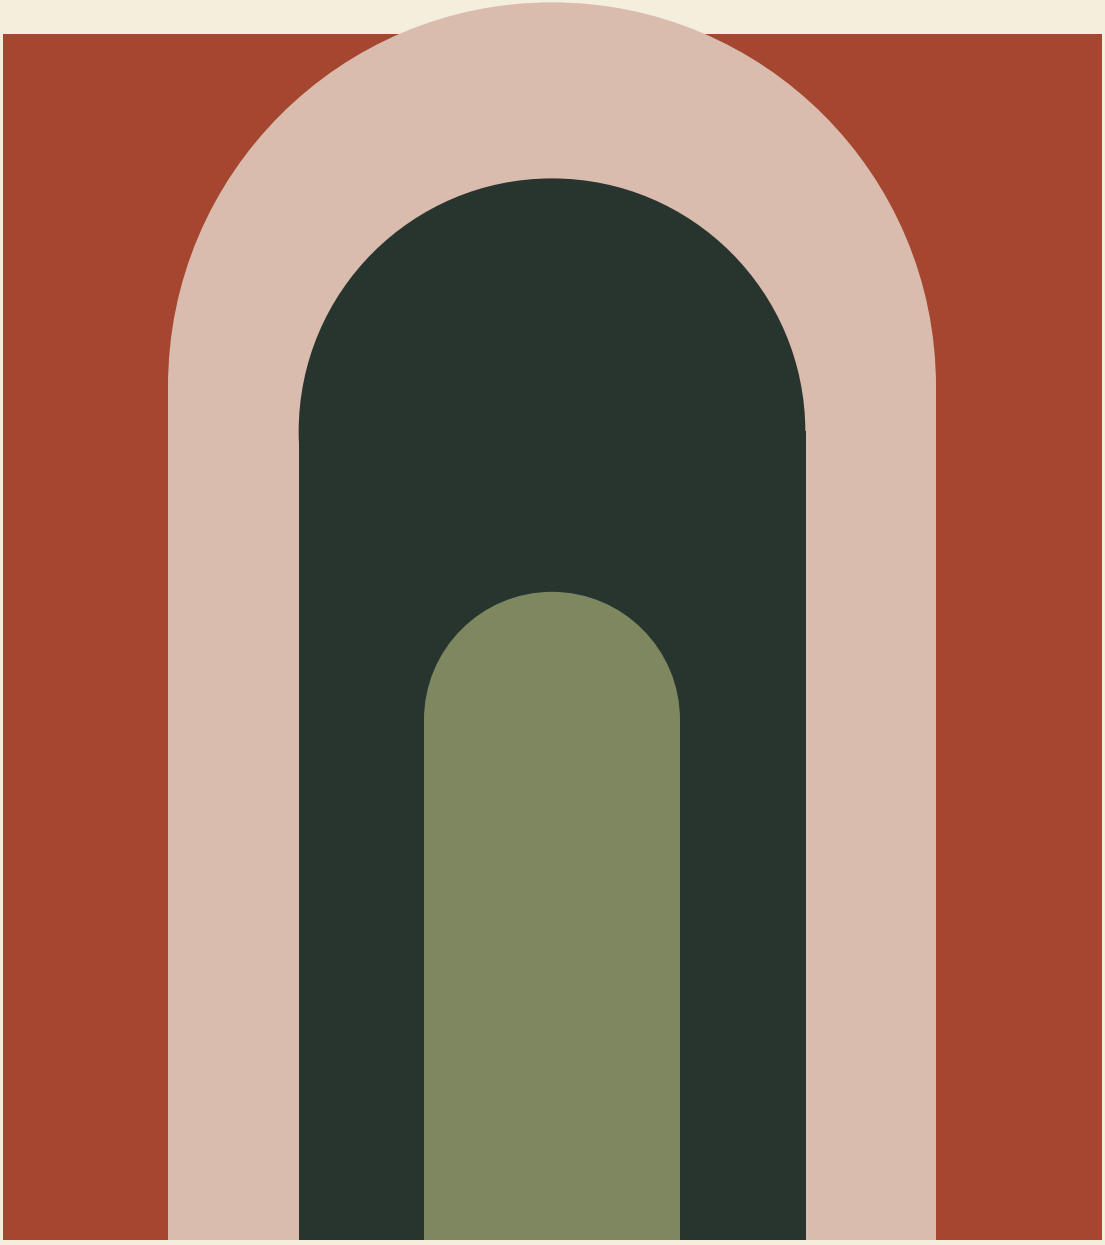
01 A warm point of focus

02 A grounded foundation

03 A clear finishing line

Small things. Big presence.

One shape becomes a pattern.
One pattern becomes a place.

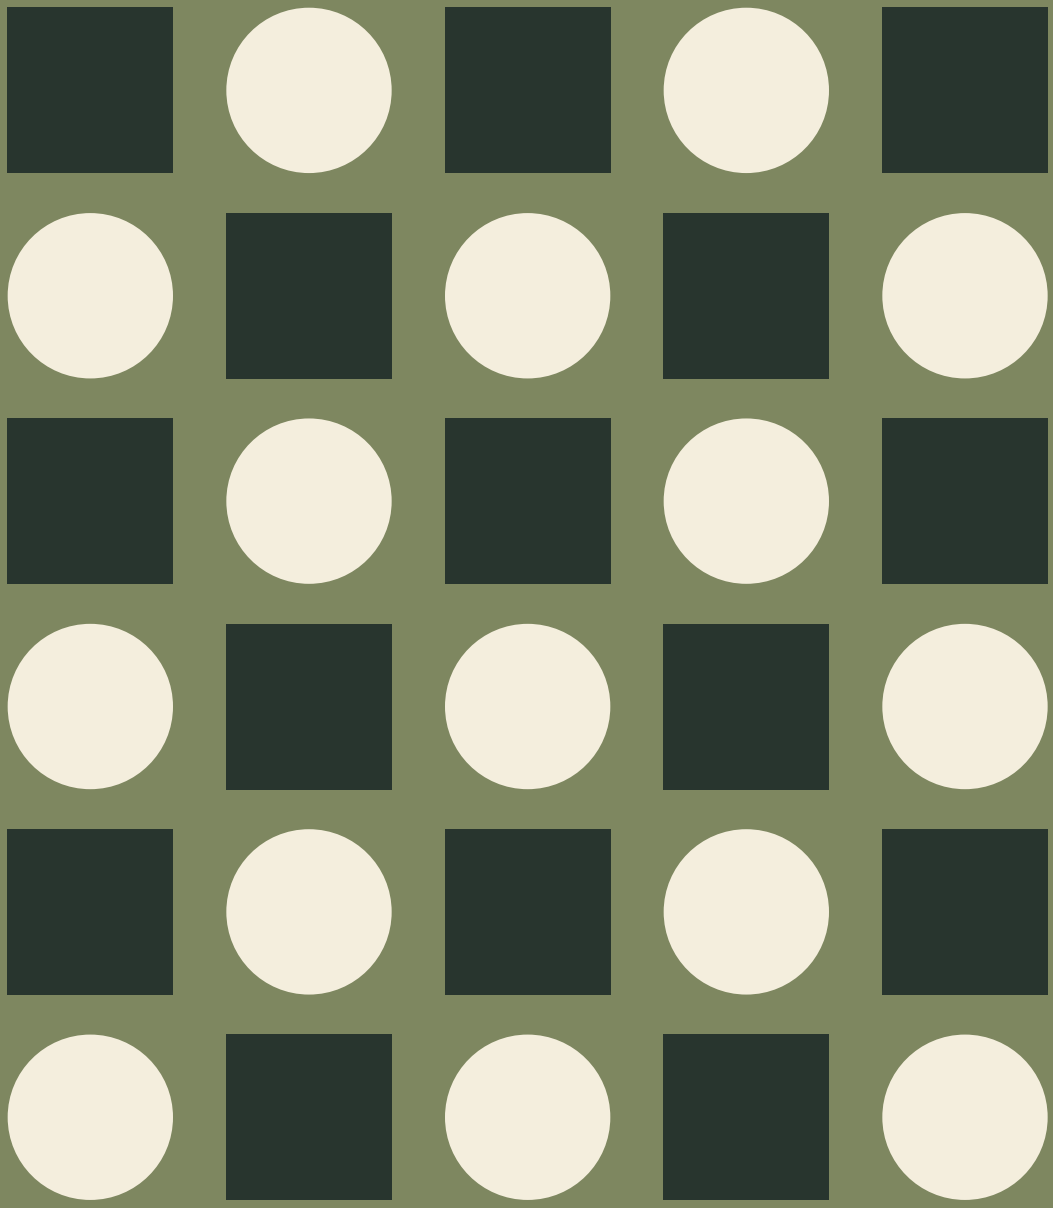


A little room for possibility.

A palette from the earth.

Warm stone. Deep leaves. Late afternoon light. Colour holds the feeling of a place.

CLAY MOSS OCHRE FOREST



A simple rhythm, repeated.

Make room for a new perspective.
